RACING BOAT CONFIGURATION

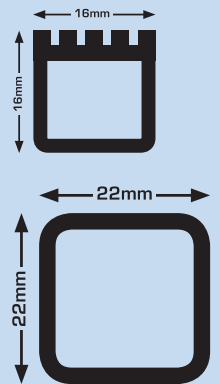

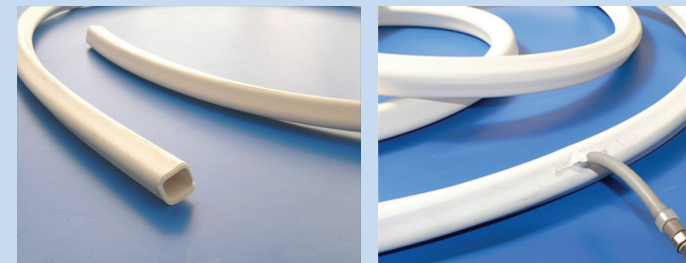

PLEASURE BOAT CONFIGURATION

AIRTECH WATER TIGHT HATCH SYSTEM

- Creates water tight seal around Lazzerette and Cockpit hatches
- Water/Air tight fridge or freezer
- Simple push to fit pneumatic connections
- Fully automatic or manual operation
- Air supply from live air, scuba tank, small compressor or hand pump
- UV Stable silicone rubber inflatable seal
- Optional stainless steel or aluminium gutter frame
- Inflatable seal available in 2 sizes 16x16mm and 22x22mm

The AirTech inflation kit includes push-to-fit connections, 4mm plastic tube and a regulator to protect the seal, for source air pressure up to 130psi.

- REGULATOR** The regulator controls the pressure coming in from your air supply
- CHECK VALVE** The check valve is a one way valve that prevents any air from travelling backwards through the system
- PUSH-BUTTON SWITCH**
- ROTARY ON/OFF SWITCH**
- DUMP VALVE (optional)** The dump valve allows you to quickly empty the tubing for quick hatch opening
- SILICONE TUBING** The tubing is made from hard wearing silicone. When inflated the tubing presses against the hatch creating a watertight seal
